

APPARATUS FOR EXTRUDING CERAMIC MOLDING

5

ABSTRACT OF THE DISCLOSURE

10 The extruding apparatus has the molding die to form
the ceramic molding, the screw extruder containing the
extrusion screw to knead and guide the ceramic material
toward the molding die. The extrusion screw is comprised
of the pressure screw part and the diffusion screw part.
The diffusion screw part provided at the front end of the
extrusion screw has a diameter greater than the screw
15 diameter of the pressure screw part.
